

MATH 298: Research Seminar in Mathematics

Mondays 4:00 - 5:00 pm in TBA

Instructor: Xiang Wan Email: xwan1@luc.edu
Office: BVM 516 Office Hours: TBA

This is an **Engaged Learning** course, approved for the Undergraduate Research category, and thus satisfies the Loyola University Chicago Engaged Learning requirement.

Credit Hours: 1.

Notice that students need 3 credit hours of Engaged Learning courses in total for the completion of their engaged learning requirement. A potential subsequent course to take is MATH 390: Advanced Research Seminar in Mathematics (2 credit hours).

Prerequisite: Math 162

Course overview: A seminar-style course that covers various topics about how to conduct research in mathematical sciences while engaging students in active research projects with faculty mentors.

Objectives: The main objectives for this course are to

1. gain an understanding of a research topic beyond the standard curriculum;
2. practice listening to talks and give feedback after critical thinking;
3. be able to communicate findings effectively through presentations;
4. learn how to write mathematics in a rigorous way and typeset professionally using \LaTeX .

Course content: The students will work on a research project of their interest under the supervision of a faculty member in the Department of Mathematics and Statistics, or on a project with faculty from other departments under the approval of the instructor.

Throughout the semester, they will

- either continue working on a project that they have had experience with, or find a topic beyond the standard curriculum that they are interested in researching in mathematical sciences through reading of some advanced materials;
- form a group with 2-3 other students. Students in the same groups will do break-out discussions together during class time and share research progress throughout the semester;
- attend a series of classes (seminars) about common topics about research, such as project management, resources, references and citations, research ethics, presentations preparation and skills, professional writing and typeset (in \LaTeX), etc.;
- attend several research seminars and colloquium talks and submit feedback with peer discussion followed;
- develop formative reflections throughout the semester alongside their research work;

- do two presentations of their work during the semester;
- create a learning portfolio as the final write-up that will include notes on their research project, slides for their presentations, a report of their project, and a critical reflection on their overall experience.
- learn various research programs and opportunities inside and outside Loyola, such as USRE and other LUROP fellowships, local, national, and international workshops and conferences, various REUs, professional organizations in mathematical sciences (such as AMS, SIAM, ASA), journal paper submission, and other aspects.

Learning Outcomes: Students will obtain an initial insight into a number of areas of advanced study in mathematics.

Course Assessment:

- Two presentations (20% each, 40% in total), tentatively in mid-February and early-April, respectively. For each presentation, the 25% are subdivided as follows:
 - Abstract (2%)
 - Organization, including outline (4%)
 - Appropriate amount of material and time spent on each slide (4%)
 - Accuracy of content (7%)
 - Overall clarity of presentation (5%)
 - Answering questions effectively (3%)
 - A reflection report; see below.

- Four Reports (2.5% each, 10% in total) throughout the semester. The second and fourth reports follow the two presentations, respectively. The first and third reports are tentatively due in late January and late March, respectively.

The reports should include reflections on

- connections and differences between their research and coursework;
- their experience with mentors;
- group discussions in and outside of class;
- attended seminars and colloquium talks;
- Final Write-up (25%). The write-up should include
 - A report of their project (built up from their research notes and presentation materials);
 - A critical reflection on their overall course and research experience.
- Course participation (25%), including
 - attendance of class and participation of in-class discussions;
 - Regular progress check-up with faculty mentors;
 - attendance of research seminar and colloquium talks; provided feedback of these talks.

Special Note: Students will attend colloquia or career panels in lieu and sometimes in addition to our usual seminar. If they are planned for different times or days than the usual class time, this will be announced well in advance.

Diversity, Equity, and Inclusion Statement:

The diversity that students bring to this class, in all its forms, is viewed as a resource, a strength, and a benefit. It is my intent to invest in each student's success and attend to each student's learning needs, both in and out of class. I will aim to present materials and activities that are respectful of diversity, equity, and inclusion, and that students from all diverse backgrounds and perspectives be well-served by this course.

Accommodations for Disabilities or Conditions:

Loyola University provides reasonable accommodations for students with disabilities. Any student requesting accommodations related to a disability or other condition is required to register with the Student Accessibility Center (SAC), located in Sullivan Center, Suite 117. Students will provide professors with an accommodation notification from SAC, preferably within the first two weeks of class. Students are encouraged to meet with their professors individually to discuss their accommodations. All information will remain confidential. For more information or further assistance, please call 773.508.3700 or visit <https://www.luc.edu/sac/>

Academic Integrity:

All work in this course must be completed in a manner consistent with the accepted standards of academic integrity. The Code of Academic Integrity will be enforced in all areas of the course. More information regarding the relevant policies and procedures, including information about your rights and responsibilities as a student, is available at https://www.luc.edu/academics/catalog/undergrad/reg_academicintegrity.shtml

Copyright:

Copyright law was designed to give rights to the creators of written work, artistic work, computer programs, and other creative materials. The Copyright Act requires that people who use or make reference to the work of others must follow a set of guidelines designed to protect authors' rights. The complexities of copyright law in no way excuse users from following these rules. The safest practice is to remember (1) to refrain from distributing works used in class (whether distributed by the professor or used for research); they are likely copyright protected and (2) that any research or creative work should be cited properly. Read more about LUC's copyright resources online: luc.edu/copyright.

Notice of Reporting Obligations for Responsible Campus Partners:

As an instructor, I am considered a Responsible Campus Partner (RCP) under Loyola's Comprehensive Policy and Procedures for Addressing Discrimination, Sexual Misconduct, and Retaliation (located at luc.edu/equity). While my goal is for you to be able to share information related to your life experiences through discussion and written work, I want to be transparent that as a RCP I am required to report certain disclosures of sexual misconduct (such as sexual assault, sexual harassment, intimate partner and/or domestic violence, and/or stalking) to the University's Title IX Coordinator. As an instructor, I also have a mandatory obligation under Illinois law to report disclosures of or suspected instances of child abuse or neglect. The purpose of these reporting requirements is for the University to inform students who have experienced sexual/gender-based violence of available resources and support. Such a report will not generate a report to law enforcement (no student will ever be forced to file a report with the police). Furthermore, the University's resources and support are available to all students even if a student chooses that they do not want any other action taken. Please note that in certain situations, based on the nature of the disclosure, the University may need to take additional action to ensure the safety of the University community. If you have any questions about this policy, you may contact the Office for Equity & Compliance at equity@luc.edu or 773-508-7766. If you wish to speak with a confidential resource regarding gender-based violence, I encourage you to call The Line at 773-494-3810. The Line is staffed by confidential advocates from 8:30am-5pm M-F and 24 hours on the weekend when school is in session. Advocates can provide support, talk through your options (medical, legal, LUC reporting, safety planning, etc.), and connect you with additional resources as needed. More information can be found at luc.edu/coalition or luc.edu/wellness.
